Board of Supervisors Approve Plans to Rehabilitate Fontana Roads

San Bernardino-Today, the Board of Supervisors, under the leadership of Supervisors Paul Biane and Josie Gonzales, approved plans to rehabilitate roads that run through unincorporated Fontana and Muscoy, using Measure I funding.

"We have authorized the Director of Public Works, Pat Mead, to advertise for bids so that the County can receive the best deal in using our Measure I funds," said Supervisor Paul Biane.

The Department of Public Works-Transportation Division has determined that Beech Avenue in Fontana and Second Avenue in Muscoy require pulverization and repaving with asphalt concrete. The total cost to complete these projects are estimated to be \$494,000.

"The residents of Muscoy have a bright future with great economic opportunities," said Supervisor Gonzales. "Beautifying Muscoy is only part of my plan to revitalize the area."

The voters of San Bernardino County approved Measure I on November 2, 2004, by a wide margin. "Thanks to the voters' wisdom in voting for our County transportation measure, such projects as these will benefit all residents in the County," Supervisor Biane concluded.
